Spillages

This site borders the Fens Pool Site of Specific Scientific Interest (SSSI), which is protected by law. All surface water from this site (car park drains and building drains) drains to the Fens Pool SSSI, so anything spilt on our roadways has the potential of contaminating surface water draining to the Fens Pool SSSI. In order to mitigate any accident hazards, we have:

- Emergency Drain Covers, located in our weighbridge and in the Effluent Treatment Plant
- Emergency Spill kits located around the exterior and interior perimeter of the factory.
- Emergency Shut Off Valve to Fens Pool Outlet.

Should you have a spillage of any kind, please contact a member of staff immediately. Protection of the drainage network is of paramount importance!

Litter

Please ensure that all items of litter are safely deposited in waste bins located around the site. If you are unable to find a waste bin, please contact a member of our workforce and they will point you in the right direction. Be advised, we operate a “zero tolerance” policy for offences of fly tipping and unauthorised waste disposal.

Any Questions?

Should you have any questions regarding this information, or any other subject, the following contacts are available:

Health & Safety, Works Management	Phill Guest	Ext 500
Maintenance & Engineering	Martin Skidmore	Ext 600
Quality & Environmental	Wayne Roden	Ext 700

Environmental Management Controlled Waste Disposal

For the Attention of all personnel & contractors working on Servosteel Sites.

Servosteel is committed to achieving and maintaining standards of safety, health, hygiene, environment and quality at both sites. In accordance with and compliance to the Environmental Protection Act of 1990, you have a duty of care to dispose of waste materials whilst working on this site by adhering to the following procedure.

1. Any hazardous waste including liquids that you may find must be reported to the Environmental Manager who will arrange for its identification and disposal under controlled conditions. This includes Fluorescent Tubes and Electrical Equipment, which may contain hazardous materials.
2. All waste paper, timber, plastic, cardboard, cable, piping must be placed into the Green Veolia General Waste Skip.
3. All waste oil rags, oil dry granules, used plastic & material gloves, rubber belting, rubber shavings, rubber oil supply pipes, canvas and carpets must be placed into the Veolia Oil Contaminated Waste Skip.
4. Any and all waste oil that you may need to dispose of must be reported to the Environmental Manager who will arrange for it to be disposed of under controlled conditions.
5. Any waste chemicals either identified or otherwise found or used must be reported to the Environmental Manager who will arrange for its controlled disposal.
6. All metal waste must be placed into the Green (Metal & Waste Recycling) Waste Skips.

Please ensure that waste is segregated as above. Plastic cups etc should not be put in metal scrap bins, or filter cake skips. **USE THE CORRECT SKIP!**

Bins and skips to accommodate the waste are located around the sites at strategic positions and it is your responsibility to familiarise yourself with their identity.
